JABC TECHWORKS 2.0 - VIRTUAL

JABC is pleased to invite you to participate in the **online** version of this popular in-person program. It's **free of charge** for all B.C. high school students and **aligns with B.C.'s new curriculum** to support CLE, CLC and more.

Are your students ready for a career in technology?

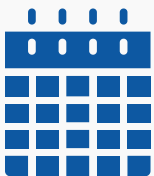

Technology has transformed the business landscape and will continue to do so at an accelerating pace. Every industry has been or will be impacted by technological advances, and the demand for highly skilled minds and leaders that can create and apply new technologies is growing. Canadian youth need to be made aware of the dynamic nature of technology careers and the knowledge and skills required to be prepared for these jobs.

JABC TechWorks has been created with the objective to expose youth to career opportunities that exist in B.C.'s tech sector. This virtual event allows students to explore the skills and education they need to get there.

Program Highlights

- **FREE** online program that will showcase the scope of technology-related career opportunities open to the next generation of employees.
- Opportunity to ask technology industry leaders and experts questions and participate in activities and live polls.
- Free access to JABC's new TechWorks library featuring diverse experts and leaders from leading B.C. tech and tech-enabled companies.
- Optional post-program activities.
