

Engineering Activity Boxes

We have developed five different Engineering Activity Boxes that include everything needed to complete three different activities related to each theme.

Included:

- 34-page Activity Booklet to take you through each activity step-by-step, it also includes mentor profiles, puzzles and colouring pages.
- Customized badge exclusive to the box
- Sticker page to work through the booklet
- Box includes all materials required to complete each activity

Discover E

DiscoverE was founded in 1993 with a goal to increase diversity and inclusion in engineering and science fields. Today our goal remains the same, with a focus on engineering. Each year our audience grows and we are able to bring our programs to new locations within Alberta, British Columbia, Saskatchewan and the Northwest Territories. In the last 27 years we have been able to reach over 500,000 young Canadians with our programs.

School District 60 has received a grant from Discover E for 300 activity boxes. The district will be purchasing additional Engineering Boxes to help support the ADST programs in our Elementary and Middle Schools.

SAFETY TRAINING

OFA Level 1 courses will be held at Hudson Hope and North Peace Secondary School in April to help students better prepare to enter the workforce.

COLLEGE VISITS

Northern Lights College has been conducting small group tours so students can walk the halls and envision themselves as students and help support transitions to post secondary.

SWIS

SWIS program is working with the Fort St John Public Library and the Early Learning Department on how they can collaborate on programs and innovative ways to offer service delivery during COVID.
