As you reflect at the end of 2022 may you find peace and acceptance. I hope that whatever you experienced this year helped you draw strength from within, support from your people, and resilience because of it. May you look forward to 2023 with courage and hope.

Students

The first report cards have been issued. Some of you did very well. Some of you need to do better. All of you can come to Room 112 during your flex, at lunch or with permission from your teacher for support and extra help in whatever you need. You have only 6 weeks left in Semester One to get your grades to where you want them.

December

This is a short month with only 2 weeks before the break. Stay strong, work hard, and don't give up! AND we have goodies for you every day of the last week.
